DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I (claims 11-12) – a process of forming a semiconductor chip comprising a step of selectively depositing a conductive material in the predetermined region on the surface protective film except the portion thereof formed with the opening, as disclosed in 2A-2F.

Group II (claims 11 and 13) – a process of forming a semiconductor chip comprising a step of depositing a conductive material on the portion of the internal interconnection exposed through the opening and in the predetermined region on the surface protective film except the portion thereof formed with the opening, and further step of depositing the conductive material on the part of the bump to complete the bump, as disclosed in Figs. 3A-3D.

Group III (claims 11 and 14-20) – a process of forming a semiconductor chip comprising a step of forming a recess in a region of the surface protective film on which the surface interconnection is to be formed before the formation of the bump and the surface interconnection, as disclosed in Figs. 4A-4D.

Group IV (claims 11 and 21-24) – a process of forming a semiconductor chip comprising a step of forming a peripheral bump provided outside a device formation region of the semiconductor substrate, as disclosed in Figs. 9-12).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 11 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phat X. Cao whose telephone number is (571) 272-1703. The examiner can normally be reached on Monday - Thursday.
